

<p>ORGANICSUPPLY S.A</p>	<p>POLÍTICA DE PREVENCIÓN DE SUSTENTABILIDAD AMBIENTAL CÓDIGO: PO-GG-07</p>	
---------------------------------	--	---

****Translation of the Spanish version of the Política de Sustentabilidad Ambiental of Organic Supply****

Environmental Sustainability Policy

Organic Supply is committed to achieving its social objectives through the creation of production systems that are environmentally sustainable, socially responsible and economically viable. It aims to maintain harmonious and respectful relationship with the natural environment of the surrounding communities, seeking the prior, free and informed consent of the community, with a view to ensuring a future of local and global well-being.

Within this framework of action and as a fundamental pillar in its commitment to Sustainable Development, Organic Supply continuously works to improve its environmental performance and that of its associated suppliers, under the following parameters:

- 1.- Monitoring the compliance of the current environmental legislation and the voluntary commitments signed in the scope of its actions.
- 2.- Identify, prevent and mitigate negative environmental impacts, and enhance the positive impacts, through the adoption of direct actions, the preparation of studies or environmental management plans, which aim to:
 - The improvement of energy efficiency;
 - The use of cleaner fuels;
 - The reduction of greenhouse gas emissions;
 - The efficient and rational use of water and energy resources;
 - The proper management of liquid and solid waste;
 - The conservation of biodiversity
- 3.- Guiding the development of their projects and / or activities, ensuring the conservation of biodiversity, High Conservation Values and forests with High Carbon Values.
- 4.- Preserving rare, threatened or endangered species of fauna and flora cited in national or international lists or red books (IUCN, CITES, others); as well as the prohibition of hunting, trafficking of wild animals and its captivity.
- 5.- Making sure that there is NO burning for land preparation, waste disposal or any other reason; except in justified cases by phytosanitary emergencies, with prior authorization from the competent authorities.
